

### **What is Vibraderm?**

Vibraderm is a revolutionary machine which quickly and painlessly improve the appearance of your skin. The Vibraderm uses a high vibration metal paddle that gently exfoliates the top layer of skin. Vibraderm vibrates away the stratum corneum and stimulates the production of new collagen. Unlike other skin treatments, the vibraderm can treat the skin on your entire body. Vibraderm can be used to effectively treat acne scars, age spots, fine lines and wrinkles, dryness, oiliness, large pores and dull skin. In addition, Vibraderm infuses cosmeceutical products deep into the skin's surface. Vibraderm leaves you with beautiful, smoother, and more youthful skin.

### **How long does the treatment take and how many sessions will you need?**

Each Vibraderm treatment takes 30-45 minutes. We suggest that you receive a series of 5-6 treatments, 5-7 days apart for the initial treatment. A monthly treatment will help to keep your skin looking its best. For a more intense treatment, we recommend another series of 5-6 treatments. There is no limit in the amount of treatments you receive.

### **What will my skin look like after the treatment?**

Your skin will immediately look and feel great. Some very slight redness may follow a treatment, but will subside within 20 minutes after the treatment. After just one treatment you will notice a great improvement in the application of your make-up and your skin will feel very soft and smooth.

### **Can you combine Vibraderm with any other procedures?**

Absolutely. Vibraderm is an ideal accompaniment to many different procedures, including Botox, IPL, and any laser treatment. By including Vibraderm with any procedure you will maximize the results but it also can replace your monthly facials with a new high tech method.
